

Sheila Bridges Design NEW YORK

"Good design should tell a story," Bridges explains. Thus, her portfolio of personal narratives for living: eclectic and worldly rooms that are also "thoughtful, timeless, and functional." An alumna of Brown University, Parsons School of Design, and Italy's august Polimoda fashion school, the Philadelphia native and part-time Reykjavik resident has put her stamp on products, too, notably Harlem Toile, a hallmark pattern that puts a bracing African American twist on the traditional French fabric and has been transmuted into wallpaper, fabric, and clothing, notably an October 2020 collaboration with Converse and Union Los Angeles. sheilabridges.com
